SOLUTION

Global Expertise

We offer critical defence and logistics expertise that allows our clients to focus on their missions on land, in the air and at sea.

Our specialized expertise

SNC-Lavalin's experience and know-how in defence and logistics is as comprehensive as it is crucial. We provide engineering, construction, operations and maintenance services to military organizations and companies around the world. Our services are key to ensuring that operations run smoothly and, most importantly, people are kept safe.

As a key service provider for Canada's Department of National Defence, we have a proven track record delivering defence and logistics solutions in remote locations and challenging climatic conditions. We're known for our reliable services and round-the-clock, mission-critical support.

Our inspection services and integrity engineering team offer integrated solutions to ensure our clients reduce unexpected downtime, extend equipment life and improve operational efficiency. All integrity inspection services are in accordance with applicable regulatory, product or application standards.

Services and expertise

- Mali - Aviation Services
- South Sudan - Aviation services
- Afghanistan - Kabul and Kandahar DND CANCAP Projects and Aviation Services
- Afghanistan - Mazar-e-Sharif, Air Support Services
- Somalia - Djibouti Aviation Services

Key Projects

Our ability to provide one-stop-shop project solutions for our clients is a key differentiator in our sector, and a powerful vehicle for delivering outstanding value to our stakeholders.

Minor Warships and Auxiliary Vessels

Canada

SNC-Lavalin provides support for 25 classes of vessels. The scope of our mandate includes new designs, repairs, spare parts, remote-control defence equipment installation, and response to support calls in an area that stretches from the Arctic to the Caribbean and from Hawaii to Europe.

Surmont Regional Residence

Canada

We were contracted to build, own, operate and maintain a 153-room accommodation facility for Phase 1 of our client's project and a 2,897-room construction and operations lodge for Phase 2. For more than ten years we have worked closely with our client to define and optimize overall project objectives and requirements including attracting and retaining qualified personnel; we collaboratively addressed environmental impacts and sustainability; and met aggressive aboriginal and local stakeholder participation targets.

CFB Trenton Maintenance Hangar 2

Canada

We provide architectural and engineering consulting services for the design of new aircraft and hangar facilities at Canadian Force Base Trenton, including Boeing C-17 Globemaster III Maintenance Hangars 1 and 6, Lockheed Martin C-130J Hercules Maintenance Hangars 2 and 5 and Canadian Army Advanced Warfare Centre. The Hangar 2 has received the Gold certification in Leadership in Energy and Environmental Design (LEED®).

White Rose, Husky Energy

Canada

Since 2004, our team has provided NDT, Integrity Engineering, Lifting Inspections, Corrosion Monitoring, Condition Monitoring in support of activities related to corrosion under insulation (CUI), external and internal monitoring and inspection for tanks, vessels, flow lines, well head equipment, choke valves, structures and utility/process piping.

Airlift Support for the US Department of State

South Sudan and Somalia

We provide and manage helicopters and fixed wing aircraft to support important international missions by moving personnel and equipment to and from remote locations in both countries. The missions include support to the UN-mandated African Union Mission in Somalia (AMISOM), and the Ceasefire and Transitional Security Arrangements Monitoring Mission (CTSMM) in South Sudan.
